

VHF Contest 2015

For VHF Contest again we chose dimension Lošov-Observatory (LOC: JN89QO). This site has been proven to us not only good, but good racing conditions and a spectacular view of the Olomouc. The report was a racing team, František OK2PYD, Pepa OK2UWJ, Tonda OK2WPA, Milan OK2VWM and Vítek OK2LET. Despite the cold and windy weather, when it looked like our racing tent, there was here, everyone came to their "amateur radio", grilovalo, pilo and aired. The journal also added to our new country Denmark (5P5T) on 144 MHz. For those who weren't on the plane the day reward was the Olomouc training years two pairs from the L-159 ALCA in the Libavá military space with low an Observatory. For adverse climatic conditions, we packed up the workplace about an hour earlier. Thanks to the Association and the Observatory at Lošově, which allowed us to occupy this beautiful place.
